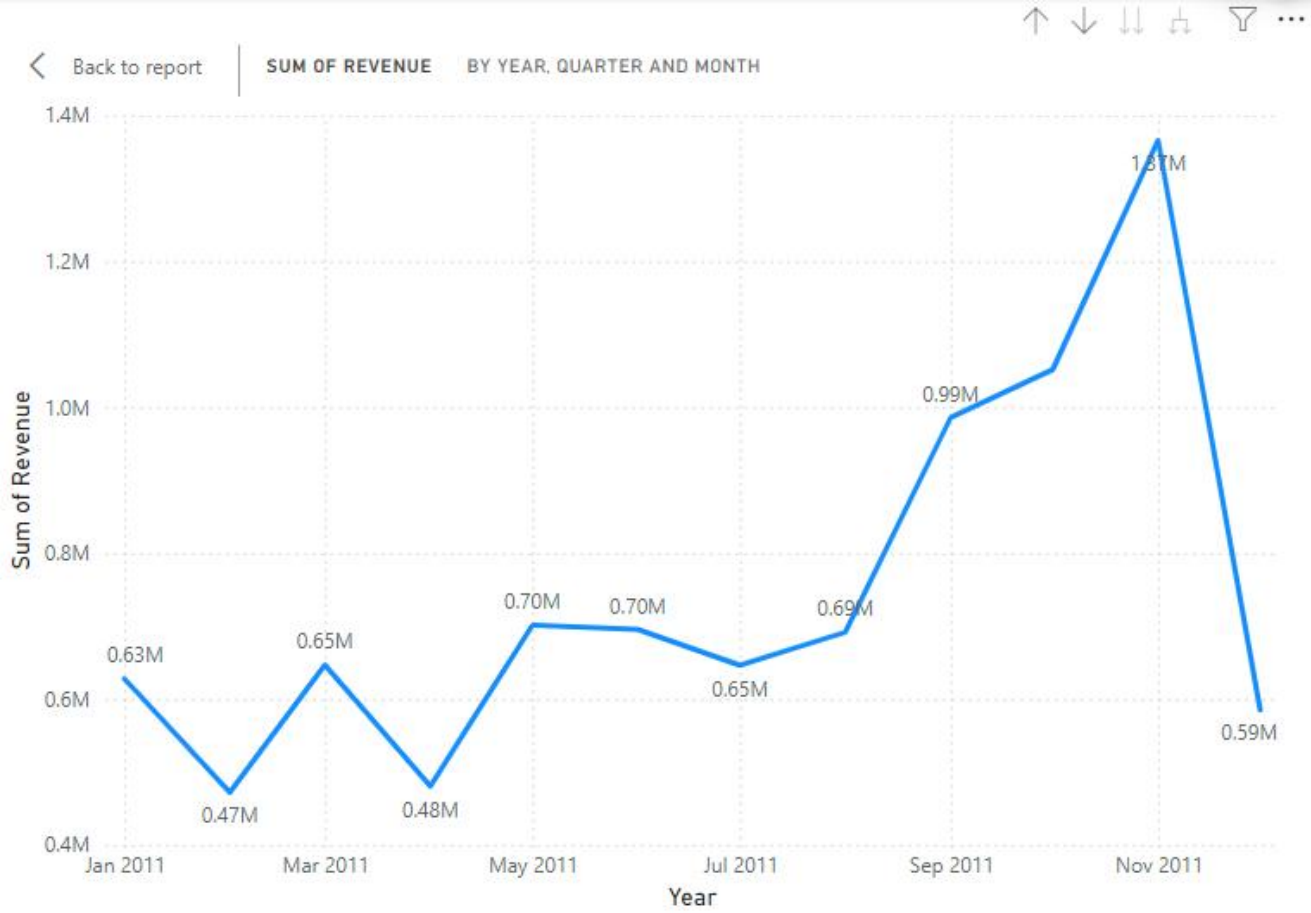
Data cleaning and preparation steps

- Imported data from excel
- Transformed data on transforming option
- Changed data type on the StockCode column to text
- Created a check that ensures quantity is not below 1 unit and the Unit price is not below $0
- Created a new column called Newinvoicedate using the DATEVALUE function
- Created a measure for revenue where quantity is multiplied by price

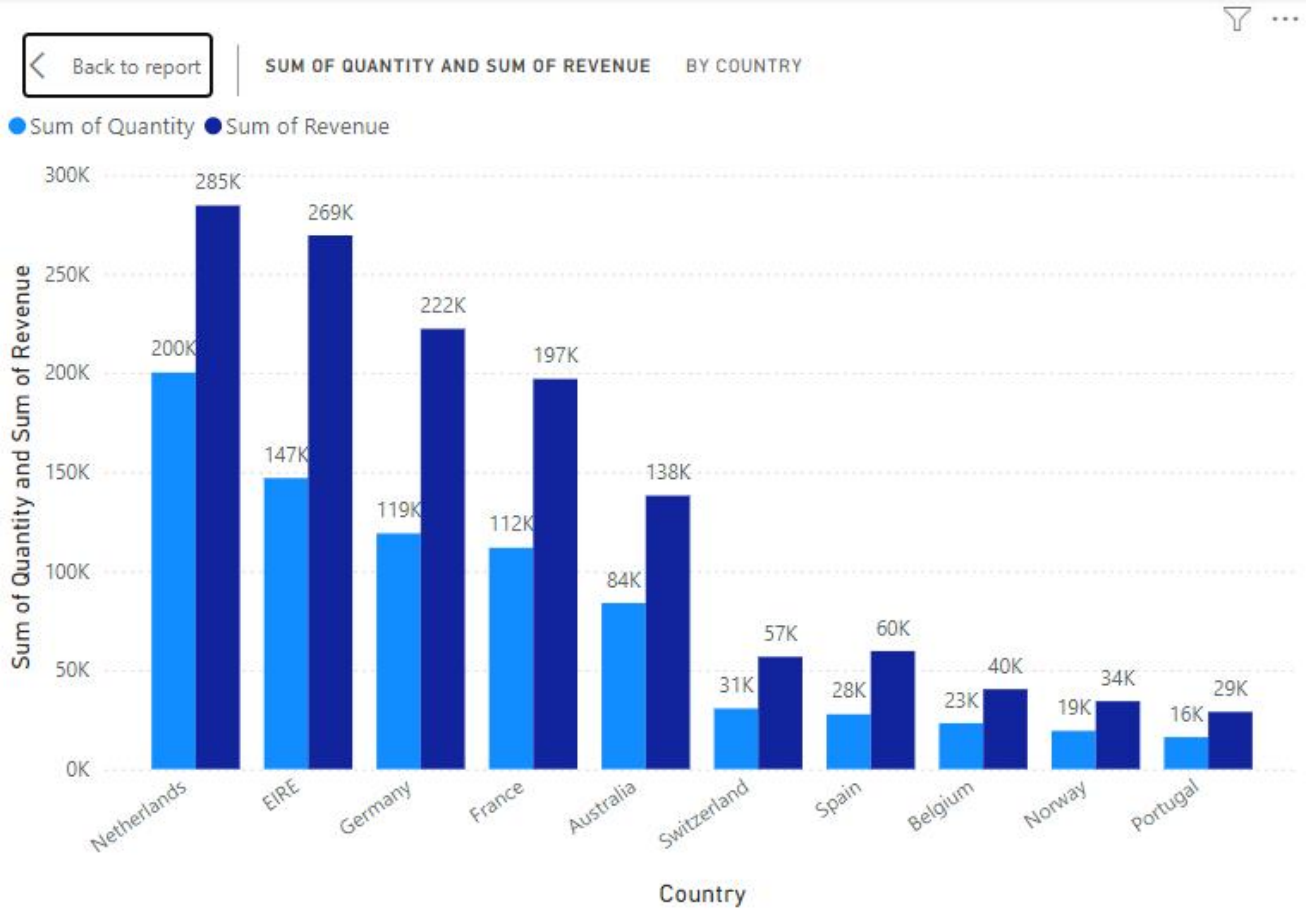
Q1 TIME SERIES OF REVENUE DATA FOR 2011



INSIGHTS

- Visualization is revenue by month and year
- I used a line chart
- The year is set to 2011
- The retail store recorded the highest revenue in November at 1.37 M.
- While the lowest sale revenue was on Febuary at 0.47 M.

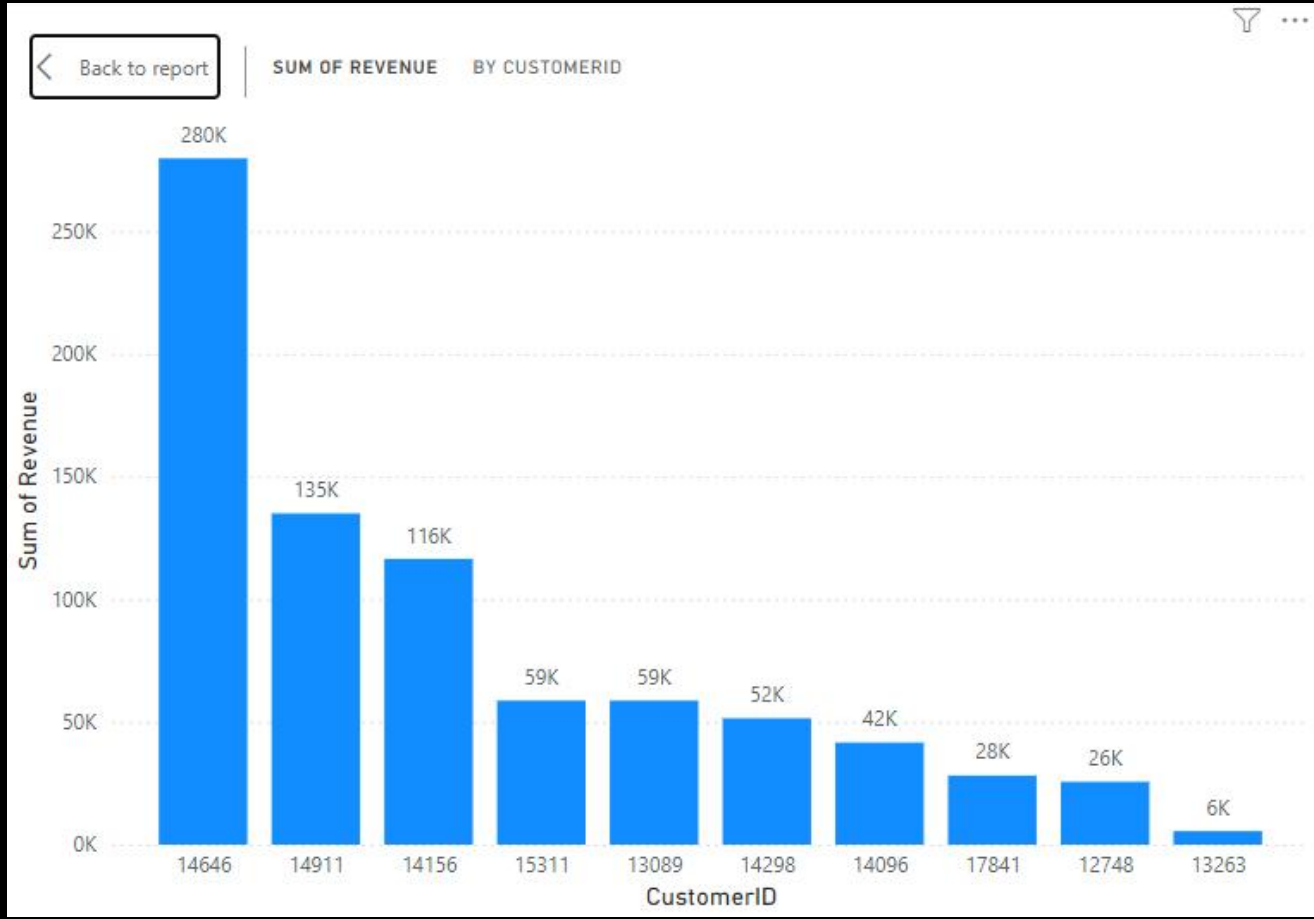
TOP 10 REVENUE GENERATING COUNTRIES EXCEPT UK



INSIGHTS

- The visualization was to get the revenue and Sum of Quantity by country
- I used a clustered column chart because of having two fields
- I also excluded UK from the visual.
- Netherlands has the highest revenue at 285k with the highest quantity at 200k while Portugal generated the least at 29k with quantity at 16k.

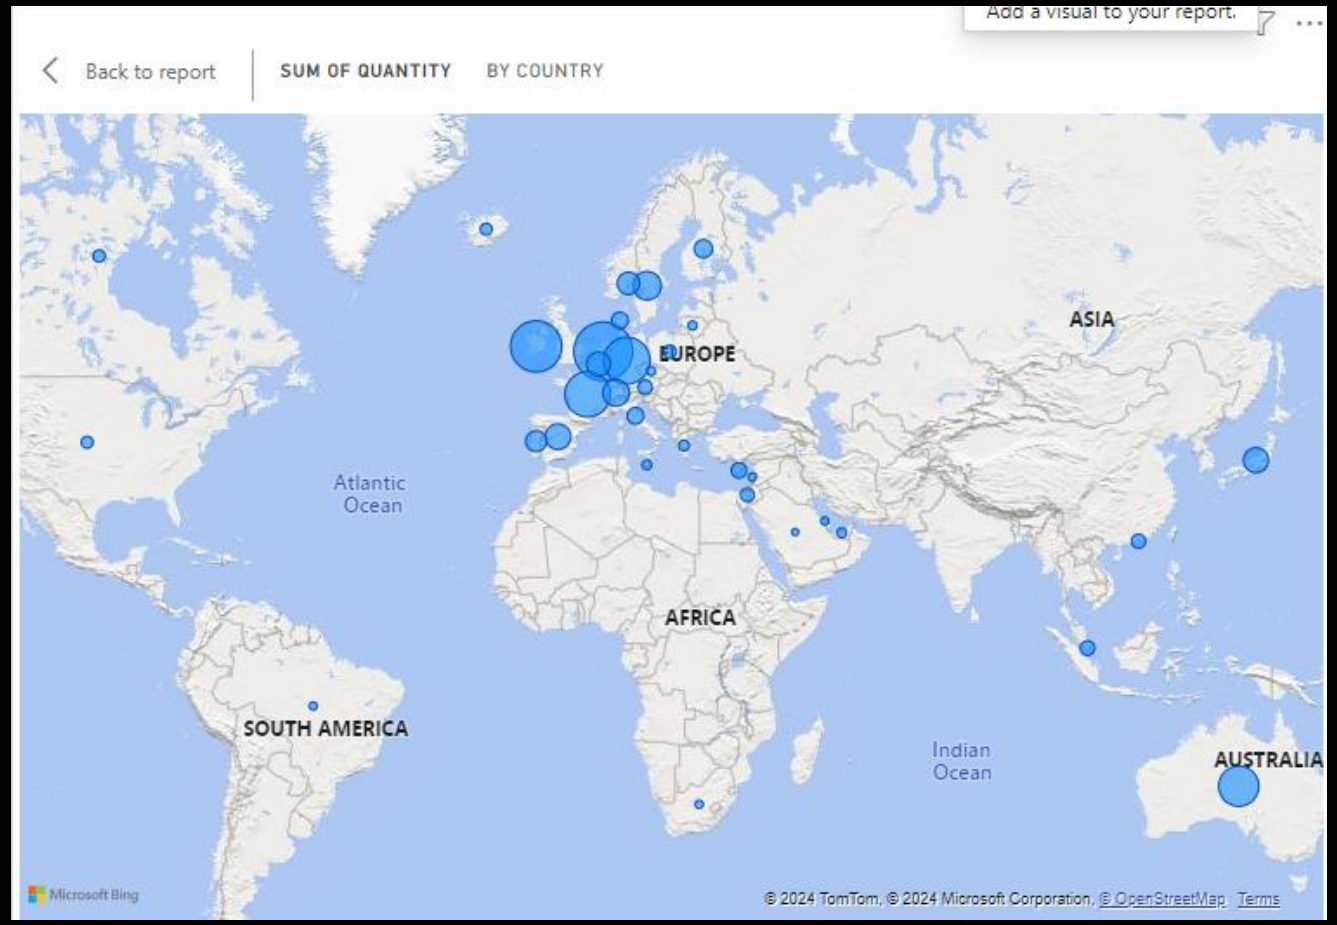
TOP 10 CUSTOMERS BY REVENUE



INSIGHTS

- Customer 14646 has the highest revenue of 280k and customer 13263 has the lowest reveue of 6k

Demand for products by country



INSIGHTS

- Europe generates higher revenue with Netherlands having a revenue of 285k
